

Jim and Doreen Boylan started their steel business from their home in 1959. Mr. and Mrs. Boylan put their heart and soul into building a family oriented organization that served as a reliable source for steel products to the booming town of Bakersfield and the surrounding areas. Originally known as Jim's Supply Co., Inc., today the business operates as Jim's Steel Supply (JSS). Jim's legacy is carried on by members of the next generation of the Boylan family, Greg and daughter Hillary, along with a staff of dedicated employees. The Boylan's are proud to carry on the company that was started 60 years ago by an incredible man with a dream, and Jim's hardworking legacy will endure through JSS for many years to come.

Our buying power is leveraged by our ability to purchase direct from mills in large quantities. In turn, we are able to source specialty and hard to find metals faster and better than our competition. Jim's Steel Supply's centrally located yard is stocked with the widest selection of steel products. We are positioned to supply our customers with quality materials at the most economic price. Contact us today.
